Index to
JOURNAL OF ENGINEERING FOR INDUSTRY
Volume 82, 1960

The Journal of Engineering for Industry in 1960 was issued quarterly in February, May, August, and November.

Issue	Page Numbers
February	1–86
May	87–172
August	173–282
November	283–444

A

AARNES, M.
Tensile and short-time creep properties of N-155 alloy sheet (D) 301

ABRAHAM, LEWIS H.
Optimum tolerances of sheet materials for flight vehicles (D) 366

ADAMS, DOUGLAS P.
Nomographic synthesis of generator linkages 29

AIRPLANES
Optimum tolerances of sheet materials for flight vehicles 363

ALBRECHT, P.
New developments in the theory of the metal-cutting process, Part I. The ploughing process in metal cutting 348

ALFREY, TURNER, JR.
Uniform two-way orientation of plastic films 167

ALUMINUM. *See* FORGING

ATTERBURY, T. J.
Effect of presetting helical compression springs 41

AUTOMATIC CONTROL
Determination of cutter trajectories for contoured turbine buckets 200

AVITZUR, B.
Analysis of power spinning of cones 231

B

BAGLEY, FENTON L., JR.
Deformation process in metal-cutting (D) 257

BAILEY, J. J.
Analytical study of drill-string vibration 122
Experimental study of drill-string vibration 129

BALL TRANSMISSIONS. *See* DRIVES

BARTON, S. P.
Influence coefficients and pressure vessel analysis (D) 267

BAXTER, M. L., JR.
Helixform bevel and hypoid gears 179

BECKER, S. J.
Theory of the ideal design of a compound vessel 136

BELL, P. O.
Dimensionless parameters for helical compression springs (D) 442

BELTS AND BELTING
Quantitative investigation of the factors which influence the fatigue life of a V-belt 47

BENDABILITY. *See* METAL FORMING

BERGMAN, D. J.
Design and analysis of welded pressure-vessel skirt supports (D) 13
Tube metal temperature for structural design (D) 275

BERMAN, IRWIN
Overstrain tests on thick-walled cylinders (D) 117

BERNETT, EUGENE C.
Tensile and short-time properties of N-155 alloy sheet 283

BERT, C. W.
Bending strength of gear teeth by cantilever-plate theory (D) 220

BOGDANOFF J. L.
Analytical study of drill-string vibration (D) 127

BORON J. F.
Bending strength of gear teeth by cantilever-plate theory (D) 220

BREWER, G. D.
Structural weight approximation for a bell-nozzle divergent section 359

BREWER, R. C.
Synthesis of epicyclic gear trains using the velocity ratio spectrum 173, 444

C

CANDEE, ALLAN H.
Bending strength of gear teeth by cantilever-plate theory (D) 221

CARLSON, H. C. R.
Effect of presetting helical compression springs (D) 44

CHANG, S. S.
Comparisons between the shearing properties of alpha-brass as derived from the cutting process and from static and impact torsion tests 315

CONFER, L. J.
Quantitative investigation of the factors which influence the fatigue life of a V-belt (D) 53

CORROSION
Prevention of sulfide-stress cracking in sour-condensate well equipment 93

CRACKING. *See* CORROSION

CROSSLAND, B.
Overstrain tests on thick-walled cylinders (D) 119
Strength of thick cylinders subjected to repeated internal pressure 143

CUNNINGHAM, W. J.
Mechanical vibration filters with nonlinear characteristics (D) 375

CYCLOID. *See* KINEMATICS

CYLINDERS. *See also* PRESSURE VESSELS
Strength of thick cylinders subjected to repeated internal pressure 143

D

DATSKO, J.
Correlation of bendability of materials with their tensile properties 309

DEBIASE, R. G.
Determination of cutter trajectories for contoured turbine buckets 200

DEFORMATION. *See also* METAL CUTTING
Analysis of power spinning of cores 231
Deformation and moments in elastically restrained circular plates under abitrary load or linear thermal gradient .. 423

DIBOLL, W. B., JR.
Effect of presetting helical compression springs 41

DRILL Strings. *See* PETROLEUM-WELL EQUIPMENT

DRIVES. *See also* GEARS
Inertial effects in a multiple-ball transmission (variable-speed) 399

DRYING
Supersonic-wind-tunnel air-drying-system design 277

E

EDGE INFLUENCE COEFFICIENTS. *See* SHELLS

EGGLESTON, D. M.
Critical comparison of metal-cutting theories with new experiemental data .. 333

ELASTICITY
Theory of the ideal design of a compound vessel 136

ELECTRIC ANALOGY
Study of critical velocity of stick-slip sliding 393

EPSTEIN, C. N.
Rocket motor gear tooth analysis (Hertzian contact stresses and times) (D) ... 229

ERISMAN, R. J.
Deformation and moments in elastically restrained circular plates under arbitary load or linear thermal gradient (D) 438
Dimensionless parameters for helical compression springs 439

F

FANGEMANN, M. GERARD
Dimensionless parameters for helical compression springs (D) 442

FATIGUE OF MATERIALS
Quantitative investigation of the factors which influence the fatigue life of a V-belt 47

FILMS. *See* PLASTICS

FINNIE, I.
Analytical study of drill-string vibration 122
Experimental study of drill-string vibration 129

FORGING
Some problems of press forging lead and aluminum 246

FORRAY, M.
Deformation and moments in elastically restrained circular plates under arbitrary load or linear thermal gradient ... 423

FRASER, J. P.
Prevention of sulfide-stress cracking in sour-condensate well equipment (D) .. 100

FREUDENSTEIN, FERDINAND
Nomographic synthesis of generator linkages (D) 38

FRICTION. *See also* METAL CUTTING, TORQUE
Study of critical velocity of stick-slip sliding 393

FUCHS, H. O.
Effect of presetting helical compression springs (D) 45

G

GALLETLY, G. D.
Edge influence coefficients for toroidal shells of negative Gaussian curvature .. 69
Edge influence coefficients for toroidal shells of positive Gaussian curvature .. 61
Influence coefficients and pressure vessel analysis 259

GATCOMBE, ERNEST K.
Rocket motor gear tooth analysis (Hertzian contact stresses and times) 223

GEARS
Analysis of factors used for strength rating helical gears 205
Bending strength of gear teeth by cantilever-plate theory 213
Helixform bevel and hypoid gears 179
Rocket motor gear tooth analysis (Hertzian contact stresses and times) 223
Synthesis of epicyclic gear trains using the velocity ratio spectrum 173, 444
Twinworm drive—a self-locking worm-gear transmission of high efficiency 191

GOLDBERG, J. E.
Analytical study of drill-string vibration (D) 127

GOODMAN, THOMAS P.
Nomographic synthesis of generator linkages (D) 38
Refinement of finite difference calculations in kinematic analysis (D) 381

GRAPHICAL METHODS
Deformation and moments in elastically restrained circular plates under arbitrary load or linear thermal gradient 423

(D) denotes discussion of a paper.

GRAPHICAL METHODS (*continued*)
Dimensionless parameters for helical compression springs 439
Nomographic synthesis of generator linkages 29

H

HANNELL, JOHN W.
Tire testing 23
HEAT TRANSFER
Effect of transient loads on the refrigerated-space temperature of a cooling complex 159
Tube metal temperatures for structural design 270
HEGINBOTHAM, W. B.
Comparisons between the shearing properties of alpha-brass as derived from the cutting process and from static and impact torsion tests 315
HERZOG, R. P.
Critical comparison of metal-cutting theories with new experimental data .. 333
HOFFMAN, GEORGE A.
Optimum tolerances of sheet materials for flight vehicles 363
HORNUNG, K. G.
Quantitative investigation of the factors which influence the fatigue life of a V-belt 47
HOWELL, J. D.
Twinworm drive—a self-locking worm-gear transmission of high efficiency (D) 199
HYDROSTATIC TESTING
Static testing high-pressure piping components 15

I

INERTIA. *See* KINEMATICS
INERTIAL GUIDANCE SYSTEMS
Discussion of the vibration characteristics of a simple mechanical connection 415
INFLUENCE COEFFICIENTS. *See* PRESSURE VESSELS, STRESSES AND STRAINS
INSTRUMENTS—MEASURING. *See* TORQUE
INSTRUMENTS—VIBRATION
Experimental study of drill-string vibration 129
IVERSEN, L. E.
Design by quantitative factor for safety (D) 391

J

JORGENSEN, S. M.
Overstrain tests on thick-walled cylinders 103

K

KALPAKCIOGLU, SEROPE
Analysis of power spinning of cones (D) .. 244
KATTUS, J. R.
Tensile and short-time creep properties of N-155 alloy sheet (D) 300
KAYAN, CARL F.
Effect of transient loads on the refrigerated-space temperature of a cooling complex 159
KECECIOGLU, DIMITRI
Shear-zone size, compressive stress, and shear strain in metal-cutting and their effects on mean shear-flow stress 79
KEGG, RICHARD L.
Correlation of bendability of materials with their tensile properties (D) 313
KIMMICH, E. G.
Quantitative investigation of the factors which influence the fatigue life of a V-belt (D) 54
KINEMATICS
Inertial effects in a multiple-ball transmission (variable-speed) 399
Nomographic synthesis of generator linkages 29
Refinement of finite difference calculations in kinematic analysis 377
Some applications of the cycloid in machine design 407
KING, C. B.
Helixform bevel and hypoid gears 179

(D) denotes discussion of a paper.

KOBAYASHI, S.
Critical comparison of metal-cutting theories with new experimental data .. 333
Role of friction in metal cutting 324
Some problems of press forging lead and aluminum 246
KRAUS, HARRY
Influence coefficients and pressure vessel analysis (D) 267
KRAUS, IRVIN
Refinement of finite difference calculations in kinematic analysis 377
KUSUDA, T.
Inertial effects in a multiple-ball transmission (variable-speed) (D) 406
KUYPER, W. W.
Determination of cutter trajectories for contoured turbine buckets (D) 204

L

LANDIS, F.
Tube metal temperature for structural design (D) 275
LEAD. *See* FORGING
LEVIN, E.
Structural weight approximation for a bell-nozzle divergent section 359
LILJESTRAND, WALTER E.
Simplified approach to understanding the suction problems for reciprocating mud pumps 87
LINKAGES. *See* KINEMATICS
LIU, JOHN K.
Photoelastic analysis of machining stresses (D) 308
LONGSTRETH, M. O.
Uniform two-way orientation of plastic films 167
LORIMER, D. M.
Tensile and short-time creep properties of N-155 alloy sheet (D) 301

M

MACDONALD, A. G.
Some problems of press forging lead and aluminum 246
MCDONALD, W. J.
Deformation process in metal-cutting ... 253
MCGUIRE, W. J.
Prevention of sulfide-stress cracking in sour-condensate well equipment 93
MACHINE DESIGN. *See also* MECHANISMS, SAFETY ENGINEERING
Uniform two-way orientation of plastic films 167
MACHINE TOOLS
Helixform bevel and hypoid gears 179
MACIOS, T. W.
Supersonic-wind-tunnel air-drying-system design 277
MANNING, W. R. D.
Overstrain tests on thick-walled cylinders (D) 119
MARCO, S. M.
Quantitative investigation of the factors which influence the fatigue life of a V-belt 47
MASON, J. F., JR.
Prevention of sulfide-stress cracking in sour-condensate well equipment (D) .. 101
MATHEMATICS
Refinement of finite difference calculations in kinematic analysis 377
MECHANISMS. *See also* GEARS
Some applications of the cycloid in machine design 407
MEKLER, L. A.
Tube metal temperatures for structural design 270
METAL CUTTING
Comparisons between the shearing properties of alpha-brass as derived from the cutting process and from static and impact torsion tests 315
Critical comparison of metal-cutting theories with new experimental data .. 333
Deformation process in metal-cutting ... 253
New developments in the theory of the metal-cutting process. Part I. The ploughing process in metal cutting 348
Photoelastic analysis of machining stresses 303
Role of friction in metal cutting 324
Shear-zone size, compressive stress, and shear strain in metal-cutting and their effects on mean shear-flow stress 79
METAL FATIGUE. *See* METAL TESTING—FATIGUE
METAL FORMING
Analysis of power spinning of cones 231
Correlation of bendability of materials with their tensile properties 309
METAL ROLLING
Optimum tolerances of sheet materials for flight vehicles 363
METAL SPINNING. *See* METAL FORMING
METAL TESTING
Overstrain tests on thick-walled cylinders 103
METAL TESTING—CREEP
Tensile and short-time creep properties of N-155 alloy sheet 283
METAL TESTING—FATIGUE
Influence of surface residual stress on fatigue limit of titanium 76
Strength of thick cylinders subjected to repeated internal pressure 143
METAL TESTING—IMPACT. *See* METAL TESTING—TORSION
METAL TESTING—TENSION
Correlation of bendability of materials with their tensile properties 309
METAL TESTING—TORSION
Comparisons between the shearing properties of alpha-brass as derived from the cutting process and from static and impact torsion tests 315
MILLING
Determination of cutter trajectories for contoured turbine buckets 200
MODELS
Study of critical velocity of stick-slip sliding 393
MOLLICK, L.
Theory of the ideal design of a compound vessel 136
MOORE, T. G.
Static testing high-pressure piping components 15
MORGAN, H. M.
Interaction of textile structures and high-speed textile processes 154
MORRIS, J. K.
Analysis of factors used for strength rating helical gears (D) 212
Rocket motor gear tooth analysis (Hertzian contact stresses and times) (D) ... 230
MORRISON, J. L. M.
Strength of thick cylinders subjected to repeated internal pressure 143
MURPHEY, B. F.
Deformation process in metal-cutting ... 253
MURPHY, J. J.
Design and analysis of welded pressure-vessel skirt supports 1

N

NOMOGRAPHS. *See* GRAPHICAL METHODS
NONLINEAR SYSTEMS. *See* SPRINGS
NOZZLES
Structural weight approximation for a bell-nozzle divergent section 359

O

OPERSTENY, E. J.
Static testing high-pressure piping components 15
OVERSTRAIN. *See* STRESSES AND STRAINS

P

PARRY, J. S. C.
Strength of thick cylinders subjected to repeated internal pressure 143
PESSEN, D. W.
Twinworm drive—a self-locking worm-gear transmission of high efficiency ... 191
PETROLEUM-WELL EQUIPMENT
Analytical study of drill-string vibration 122
Experimental study of drill-string vibration 129
Prevention of sulfide-stress cracking in sour-condensate well equipment 93
Simplified approach to understanding the suction problems for reciprocating mud pumps 87
PHOTOELASTICITY
Photoelastic analysis of machining stresses 303
PIPING SYSTEMS
Static testing high-pressure piping components 15
PLASTICS
Uniform two-way orientation of plastic films 167
